

Case studies: Selection and overview

Malgorzata (Gosia) Blicharska, SLU
Stakeholder Workshop, Brussels 24 May 2013

Selection process

- Several meetings and discussions
- Pre-scanning of initially chosen cases
- Selection criteria
- Final selection
(September 2012)

Selection criteria

- Different arguments
- Variety of contexts
- Criteria based on research questions

Selection criteria

Research questions	What do we want to learn?
BESAFE: Effectiveness of arguments	Which arguments work best in different contexts ?
WP 3: The interaction between governance scales	Are there different arguments at different governance levels ? How does arguments transfer across the levels?
WP 4: Relationship between ecosystem services (ES), biodiversity (BD) and values	How different stakeholders perceive the relationship between ES, BD and values?

The final choice

- **12 deep case studies:** general BESAFE question; specific WP 3 & 4 questions
- **2 comparative studies:** specific WP 3 & 4 questions

Comparative studies

- EU Biodiversity Strategy 2020 – national implementation → governance scales (WP3)
- Perceptions of ES, BD and values at the national level → ES, BD and values (WP 4)

Deep case studies (1)

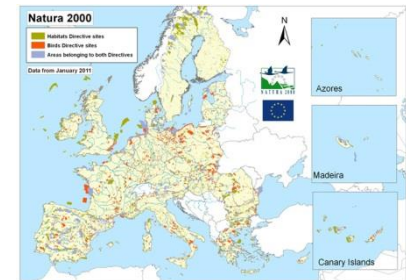

Arguments in policy framing and implementation

Invasive species strategies, Germany, Belgium, Hungary

National Strategy for Mires and Peatlands, Finland

Department of Environment, Food and Rural Affairs Biodiversity Action Plan, UK

Implementing NATURA 2000 network, EU level, Europe

Deep case studies (2)

Arguments in biodiversity conservation conflicts

Large mammals in Norwegian wild-lands

Public controversies around return of red fox & wild boar to Flanders, Belgium

Bialowieza Forest conflict, Poland

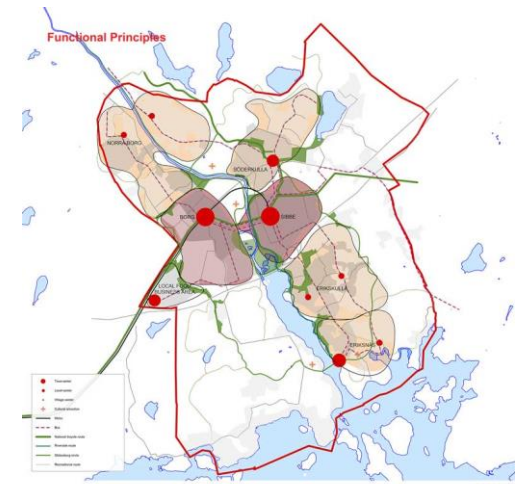

Deep case studies (3)

Arguments in planning and management

Nested Socio-Ecological Systems in Romanian Lower Danube River Catchment

Long-term management of urban green areas, Finland

Management plans for the Andalusia national parks, Spain

Deep case studies (4)

Arguments in business and investments

Water company uses of valuation evidence in investment planning, UK

An underwater tidal electricity turbine, Northern Ireland

WP 3 and 4 aims in deep cases

- WP 3 (governance scales):
 - All deep case studies
- WP 4 (ES, BD and values):
 - Large mammals in Norway
 - Spanish national parks
 - Danube River social-ecological system

Thank you!
